## SUMMARY

---

A fresh graduate with a passion for software testing and the drive to help a team find and fix bugs. I have a strong desire to learn more by engaging in hands-on projects and working with experienced professionals. Equipped with a basic understanding of principles and methodologies concerning the testing of software, I demonstrate exceptional attention to detail, robust analytical skills, and effective communication. Prepared to take my passion for quality assurance into a dynamic team and support the delivery of high-quality software products.

## PROJECTS

---

### E-Commerce Website Functional Testing ( Running ) | Microsoft Excel

[Link](#)

- Created a few Test Scenarios based on the FRS document for an e-commerce demo website named "Opencart".
- Created Test Cases for each Test Scenarios.

### Supershop Management System | PHP, SQL, CSS, HTML5, and JavaScript

[Link](#)

- Constructed an online food ordering website(online Bakery), in a local environment, that facilitated selecting items and customizing selections, placing orders through the website.
- Implemented search options by product name, category, employee name, and address.
- Added viewing all sales and search sales by date and month, and generated sales reports for the required time range.
